

I'm writing to oppose NAB petition #04-160 in regards to limitations on satellite radio.

Satellite radio provides me with variety, service, and information that no other medium offers---and since I'm willing to pay for such a service---why should I be denied the opportunity to get the services I desire---not just the ones the local radio stations choose to offer me.

I listen to almost no local radio---XM provides much more that I could ever want.

Thank you

Harry Falk
